EXPERIENCE | PORTFOLIO

CONDUCTink Website
Freelance | December 2023 - October 2024

- Executed the full design to development cycle, translating high fidelity Figma wireframes into a performant, fully responsive production website utilizing HTML, CSS, and JavaScript.

- Optimized front-end code and assets to deliver a fully responsive product that achieved high Google Lighthouse scores across four metrics: Performance (77), Accessibility (93), Best Practices (100), and SEO (91), successfully aligning technical quality with the client's brand vision.

Maloney Vacation Rentals
Freelance | October 2025 - Present

- Utilized Figma for comprehensive wireframing and UI design prior to development, ensuring a streamlined and intuitive user experience for availability checking.

- Successfully executed the project using WordPress and Elementor, marking a rapid and effective adoption of new tools to meet client requirements.

- Engineered and launched a new global property management platform to centralize booking and availability for a portfolio of four distinct properties, including two international locations across Europe.

Full-Stack Developer & UI Design
DSA Labs | July 2024 - January 2026

- Spearheaded the UI/UX design and client presentation for a major software collaboration with ScoreBreak, ensuring visual consistency and feature integration across two distinct platforms.

- Developed and maintained critical backend functionalities (e.g., Python/Django) for the admin panel, supporting over 1,000 teams and over 20,000 players, streamlining daily operations for company managers.

- Assisting in quality assurance for a third party platform Grid Iron on their player fan vote. This site has 1,689 active voters with 16,741 votes casted.

- Engineered and integrated a proprietary Match Odds & Predictions evaluator into the core software, creating a new high-value data product that positioned the company to enter the competitive sports betting market.
